Risk Committee: Minutes Extract, 14 April 2026

Risk Committee. Extract of the minutes of 14 April 2026.

Item 2: Complaints report for March

Customer Service reported 612 complaints in March. 71 percent were resolved within 14 days. The slowest category was motor claims, with an average of 38 days to resolve.

Item 4: Top risks

The Committee ranked the top three risks: failure of the mobile money switch, fraud by insiders, and poor quality of customer data that feeds the regulatory returns. The Committee noted that two regulatory returns in the first quarter were corrected after submission because of duplicate customer records.

Item 6: Data quality

The Head of Risk will propose six data quality rules for the customer table and a monthly report to this Committee.
