Branch Cash Handling Procedure

Teller limits

A teller may hold up to UGX 15,000,000 in the drawer. Cash above that amount is moved to the vault in the presence of a second person.

Dual control

The vault is opened by two officers holding separate keys. The vault log is signed at each opening. Cash counts are done at opening, at midday and at closing.

Cash in transit

Cash is moved between branches only by the approved security company. Branch staff do not carry cash in private vehicles.

Differences

A cash difference above UGX 50,000 is reported to the Branch Manager the same day and to Branch Operations within 24 hours. A teller with three differences in a month is retrained.
