Claims Handling SOP, Version 4

Kitara Assurance, Claims Department. Standard operating procedure for general insurance claims. This version replaces Version 3.

1. Acknowledgement

Every claim notification is acknowledged within 48 hours, by SMS and by letter or email. The claims officer opens the file in the claims system and records the policy number, the date of loss and the customer phone number.

2. Documents

For a motor claim the customer provides the claim form, a copy of the police report, the driving permit and photographs of the damage. For a home claim the customer provides the claim form and an inventory of the items lost. The claim is complete when the last required document is received. The claims officer lists missing documents in one message, not several.

3. Assessment

A loss adjuster is appointed within three working days for any claim above UGX 3,000,000. The adjuster reports within seven working days.

4. Settlement timeframe

Kitara settles an accepted claim within 30 calendar days of receiving the last required document. Payment is made by bank transfer only. Cheques are no longer issued for claims.

5. Approval limits

- Claims Officer: up to UGX 8,000,000
- Senior Claims Officer: up to UGX 30,000,000
- Head of Claims: up to UGX 100,000,000
- Claims Committee: above UGX 100,000,000

6. Fraud indicators

A claim with two or more fraud indicators is referred to the Special Investigations Unit before any payment. The customer is told only that the claim is under review.

7. Repudiation

A claim that is declined is declined in writing. The letter gives the policy clause relied on and tells the customer how to complain and that the matter can go to the insurance regulator after 30 days.

8. Records

The claim file is kept for seven years after settlement. Life claim files are kept for 15 years.
