Document Naming and Versioning Guide

File names

Use Department_Title_vNN_YYYY-MM-DD. Do not use words such as final, new, latest or copy in a file name.

Version history

Every policy has a version table on its last page with the version number, the date, the author and a one-line summary of the change.

Replacing a document

Publish the new version, then move the old one to the department's Archive folder within five working days. Tell staff by circular when a policy is replaced.
