Know Your Customer (KYC) Procedure

This procedure applies to every branch and agent that opens an account for a new customer.

1. Identification

A new customer shows one original photo identification: a national identity card, a valid passport or a refugee identity card. A driving permit is accepted only for opening a Mobile Wallet. It is not accepted for savings or current accounts. The officer records the identity number, checks the photograph against the customer and scans the document.

2. Proof of address

The customer provides a utility bill, a tenancy agreement or a letter from the Local Council chairperson. The document must not be older than three months.

3. Politically exposed persons

An account for a politically exposed person, or a close family member, needs the written approval of the Head of Compliance before it is opened. These accounts are treated as high risk.

4. Customer information refresh

Customer details are refreshed every two years. For high risk customers the refresh is every year. A branch that cannot reach the customer after two attempts flags the account for restricted use.

5. Enhanced checks

Enhanced checks apply when a customer deposits cash above UGX 20,000,000 in one day, when the customer lives outside Uganda or Kenya, and when the source of funds is unclear.

6. Records

Identification copies are kept for ten years after the account is closed.
