Mobile Money Agent Manual

Daily routine

Open the float register in the morning. Record the opening float. After each transaction check that the confirmation message matches the amount. Reconcile and sign the register at 6:00 pm.

Customer identification

Check the original identity document for every wallet opening. A customer who cannot show an identity document is sent away without a wallet.

Receipts and disputes

If the customer says money was not received, ask for the transaction number and call the agent support line at once. Do not reverse a transaction yourself.

Failed or repeated messages

When the network is slow the switch may send a confirmation twice. Tell the customer to wait ten minutes before trying again. A repeated message does not mean the money was sent twice.

Security

Never share your agent PIN, not even with a Kitara officer. Kitara staff never ask for it.
