KLAi

KLAi Professional Learning

Practical AI and data skills, taught live

For professionals who want to be AI-ready, change career or add a skill. Live and hands-on, using free tools.

AI & Data Science

Career changers. No coding needed

Frame questions, build tested models, ship a live app.

48 hours
24 sessions

Machine Learning

Analysts and engineers who code

Build predictive models and prove they work.

36 hours
18 sessions

Mathematics for AI & ML

Beginners welcome. High school algebra is enough

The maths behind ChatGPT, Gemini and Claude, step by step.

36 hours
18 sessions

Python & SQL for Data Analysis

Analysts and business teams

Analyse data and build dashboards in Power BI, Tableau or Python.

36 hours
18 sessions

AI & Automation

Professionals using AI at work

Identify and automate a repetitive workflow in your job.

24 hours
12 sessions

Enterprise Data Readiness for AI

Leaders, organisations and data teams

Leave with a clear framework to get your data AI-ready.

24 hours
12 sessions

Every course ends with a certificate and a project built on your own work.
