HOLIDAY DATA AND AI CAMP

DECEMBER 2026 INTAKE

Python for Data Analysis

Turn raw data into clear findings.

8 WEEKS • ONLY 15 PLACES • MAX. 5 LEARNERS PER GROUP

For S.4–S.6 students and vacists.

Own laptop required. No coding experience needed. Choose one track.

24 classes: three weekly. Other days: project practice.

TOOLS YOU WILL USE Python • Jupyter • NumPy • pandas • matplotlib • seaborn

YOUR EIGHT WEEK ROADMAP

WEEKS 1–2	Write and run your first Python programs
WEEKS 3–4	Clean data, compare groups and explain charts
WEEKS 5–6	Explore patterns and merge tables carefully
WEEKS 7–8	**Build and present your individual project**

BY THE END, YOU WILL BE ABLE TO

- Analyse data with Python and pandas
- Clean messy records and keep an audit trail
- Visualise patterns and explain the evidence
- Explore data with NumPy and seaborn
- Merge tables and check every total
- Present your individual analysis project

Your individual final project

Analyse sample sales data to identify the best-selling products and explain the evidence. Leave with a Python notebook, charts, a cleaning log and a report.

Projects use synthetic sample data. Demonstrate your work to parents/guardians and earn a completion certificate by meeting the course requirements.

AI literacy: Learn when AI coding assistants can help—and how to check their answers.

Jotham Martin Wambi • Main tutor

Data scientist and ML/AI engineer; AI & ML lecturer at IUEA. Master's, Yamaguchi University, Japan; incoming PhD student in Applied Informatics at Osaka Metropolitan University, Japan (April 2027).
