DECEMBER 2026 INTAKE

HOLIDAY DATA&AI CAMP

Practical skills. Real projects. Greater opportunities.

For S.4, S.5 & S.6 students and school leavers

MAIN TUTOR

Jotham Martin Wambi

Data Scientist & ML/AI Engineer

LECTURER

AI & Machine Learning
International University of East Africa (IUEA)

Master's — Yamaguchi University, Japan

Incoming PhD student
OMU, Japan

DATA ANALYSIS

Turn real data into useful insights

Python · pandas · SQL

- Python (programming basics)
- SQL (querying data)
- Data cleaning & preparation
- Data visualization (dashboards & charts)
- Basic statistics

BUILD: A data analysis project
e.g. sales, customer or social media data

MACHINE LEARNING

Teach computers to find patterns & make predictions

Python · pandas · scikit-learn

- Python
- Machine learning concepts
- Model training
- Prediction & evaluation
- Real-world datasets

BUILD: A prediction model
e.g. house prices, classification or recommendation

By the end of the camp, learners will have:

- **Built a practical portfolio project**
- **Analysed real datasets**
- **Created data visualisations**
- **Built a prediction model** (Machine Learning track)

8 weeks | **Max. 5 learners per group** | **No coding experience needed** | **Only 15 places** (whole programme)

Programme fee per learner

UGX 1,000,000

Same fee for groups of 1–5 learners
