KLAi Professional Learning

Practical AI and data skills

In person, online or hybrid

AI & Data Science

Career changers. No coding needed

From a business question to a tested model and a web app.

48 hours
24 sessions

Machine Learning

Analysts and engineers who code

Train and test models, then read the metrics.

36 hours
18 sessions

Mathematics for AI & ML

Beginners welcome. High school algebra is enough

The maths inside ChatGPT, Gemini and Claude.

36 hours
18 sessions

Python & SQL for Data Analysis

Analysts and business teams

Clean, query and chart data with Python, SQL and Power BI.

45 hours
15 sessions

Applied AI & Automation

Executives who want to see how AI works

How AI works, with a touch of the maths, through to agents and policy.

30 hours
15 sessions

Leading with AI

CEOs, directors and senior managers. No maths

Where AI pays in your industry, and how to lead your people through it.

30 hours
15 sessions

Enterprise Data Readiness for AI

Leaders, organisations and data teams

A roadmap to get your company's data ready for AI.

24 hours
12 sessions

Every course ends with a certificate and a project from your own work.
