Leading with AI

Where AI pays in your industry, and how to lead your people through it | 15 sessions of 2 hours | dates and format agreed with you

For CEOs, managing directors, board members, directors and senior managers who want to know where AI creates value in their industry, at work and for their employees. No mathematics and no technical background: every idea is a picture, an everyday comparison and real, named cases from banking and microfinance, telecom and mobile money, agriculture, manufacturing and FMCG, healthcare and insurance and the public sector, Uganda and East Africa first.

Session 0 sets out the map. Sessions 1 to 5 show what AI can do (see and read, predict, understand language, write) and how to judge it. Sessions 6 to 8 cover choosing models and vendors, getting good work from assistants, and making AI know your documents. Sessions 9 and 10 cover failures and agents. Sessions 11 to 14 are practical: you redesign work and cost it, plan for your people, set the rules and check your data, and leave with your AI Opportunity Portfolio and a 90-day plan. Every session ends with a one-page take-away. There are no tests and no marks.

The fifteen sessions

No.	Session	You keep
1	AI that sees and reads: images, documents and speech	A one-page sheet: one idea behind seeing, reading and hearing, when it struggles, the questions to ask, today's recorded results, and your new portfolio entry
2	AI that predicts from your data	A one-page sheet: the three kinds of prediction, the four data checks, the questions to ask, today's recorded results, and your new portfolio entries
3	Is it any good? Accuracy claims and the cost of mistakes	The vendor question sheet on accuracy, and a cost-of-a-mistake line for each entry in your AI Opportunity Portfolio
4	AI that understands language: sort, search, translate and summarise	A one-page sheet: the four language jobs, the map of meaning, today's recorded search results, the questions to ask, and your new portfolio entries
5	Generative AI: how chatbots write, and why they sometimes invent	A one-page sheet: how a chatbot writes, why answers vary, where it invents, the five questions to ask of any answer, today's recorded runs, and your new portfolio entry
6	The AI market: models, vendors, and buy, rent or build	A one-page sheet: the three routes, the four questions, the vendor questions, today's recorded comparison, and the route for each portfolio entry
7	Getting good work from AI assistants: prompting for leaders and teams	A one-page sheet: the five parts of a brief, the test on ten tasks, the jagged frontier, today's recorded runs, and your team task with its brief, kept in the Reusable Brief Template and the Reliability Test Record
8	Making AI know your business: assistants on your own documents	A one-page sheet: the open-book picture, the climb from prompt to retrieve to customise, the document checks, the questions to ask, today's recorded scores, and your new portfolio entry
9	When AI goes wrong: failures, risk and checking	A one-page sheet: the five failures, the five-step check, the test-set template, the cost of an error in shillings, the questions to ask, and your portfolio entries with their worst failure
10	AI agents: delegating work that acts	A one-page sheet: the agent loop, the four kinds of key, the five levels of freedom, the controls, the signs of a hidden instruction, the questions to ask, and your portfolio with a level for each entry
11	Redesigning work: workflows, value and the business case (practical)	Your mapped workflow with a choice on every step, your Business Case Workbook with the payback and the first-year gain, and your portfolio scored on value and feasibility

No.	Session	You keep
12	Leading people through AI: roles, skills, adoption and change	Your People and Skills Plan for your first AI use, the employee briefing, and the people column of your AI Opportunity Portfolio
13	Governance and buying: policy, risk register and vendors	Your AI Use Policy draft, your Risk Register, your lawyer page, your Vendor Question List, the risk column of your portfolio, and a board briefing outline
14	Data readiness, AI roadmap and your 90-day plan	Your inventory and scorecard, your final AI Opportunity Portfolio, your 90-day roadmap with owners and check-ins, and the Follow-up Kit

What you will be able to do

- Spot where AI creates value in your industry and your organisation, with named examples from your sector.
- Judge an accuracy claim, a pilot, a vendor and a risk, and ask the questions that matter.
- Get reliable work from AI assistants, and know when not to trust the answer.
- Redesign a workflow, cost it and decide where a rule, an AI step, an agent or a person fits.
- Lead your people through the change: roles, skills, fears and adoption.
- Set the rules, check your data and start a governed 90-day plan from your AI Opportunity Portfolio.

How we work

Each session pairs short explanations with demonstrations that the instructor runs while you watch, and you may join in. Sessions 1 to 10 each end with a hands-on step on your own organisation. Sessions 11 to 14 are practical and most of the time is yours. Examples come from a fictional company, Nile Valley Foods Ltd, and from finance, operations, customer service, HR, sales, compliance and legal settings, so you never need to share company data in class. Other tools on the market are discussed as options only.

Before the first session

- Nothing to prepare. Read the Course Handbook if you can.
- Bring a laptop and one AI assistant account you already use, if you want to join in the demonstrations.
- Choose your industry in Session 0 and think of two or three decisions or workflows in your organisation you would like AI to help with.
- Use only sample or invented data for practice. Never paste personal or confidential data into a tool you have not approved.

After the course

You receive a follow-up kit. At 30, 60 and 90 days the instructor checks what is running, how much time it saves and what changed in your policy, and you return a one-page check-in form and a results tracker.
